### Due Date Approaches for 2016 Federal Income Tax Returns

Tax filing season is here again. If you haven't done so already, you'll want to start pulling things together — that includes getting your hands on a copy of last year's tax return and gathering W-2s, 1099s, and deduction records. You'll need these records whether you're preparing your own return or paying someone else to do your taxes for you.

#### Don't procrastinate

The filing deadline for most individuals is Tuesday, April 18, 2017. That's because April 15 falls on a Saturday, and Emancipation Day, a legal holiday in Washington, D.C., is celebrated on Monday, April 17. Unlike last year, there's no extra time for residents of Massachusetts or Maine to file because Patriots' Day (a holiday in those two states) falls on April 17 — the same day that Emancipation Day is being celebrated.

#### Filing for an extension

If you don't think you're going to be able to file your federal income tax return by the due date, you can file for and obtain an extension using IRS Form 4868, Application for Automatic Extension of Time to File U.S. Individual Income Tax Return. Filing this extension gives you an additional six months (to October 16, 2017) to file your federal income tax return. You can also file for an extension electronically — instructions on how to do so can be found in the Form 4868 instructions.

Filing for an automatic extension does not provide any additional time to pay your tax! When you file for an extension, you have to

estimate the amount of tax you will owe and pay this amount by the April filing due date. If you don't pay the amount you've estimated, you may owe interest and penalties. In fact, if the IRS believes that your estimate was not reasonable, it may void your extension.

**Note:** *Special rules apply if you're living outside the country or serving in the military and on duty outside the United States. In these circumstances you are generally allowed an automatic two-month extension without filing Form 4868, though interest will be owed on any taxes due that are paid after April 18. If you served in a combat zone or qualified hazardous duty area, you may be eligible for a longer extension of time to file.*

#### What if you owe?

One of the biggest mistakes you can make is not filing your return because you owe money. If your return shows a balance due, file and pay the amount due in full by the due date if possible. If there's no way that you can pay what you owe, file the return and pay as much as you can afford. You'll owe interest and possibly penalties on the unpaid tax, but you'll limit the penalties assessed by filing your return on time, and you may be able to work with the IRS to pay the remaining balance (options can include paying the unpaid balance in installments).

#### Expecting a refund?

The IRS is stepping up efforts to combat identity theft and tax refund fraud. New, more aggressive filters that are intended to curtail fraudulent refunds may inadvertently delay some legitimate refund requests. In fact, beginning this year, a new law requires the IRS to hold refunds on all tax returns claiming the earned income tax credit or the refundable portion of the Child Tax Credit until at least February 15.<sup>1</sup>

Most filers, though, can expect a refund check to be issued within 21 days of the IRS receiving a return.

## Why Diversification Matters

**Diversification and asset allocation are methods used to help manage investment risk; they do not guarantee a profit or protect against investment loss.**

When investing, particularly for long-term goals, there is one concept you will likely hear about over and over again — diversification. Why is diversification so important? The simple reason is that it helps ensure that your risk of loss is spread among a number of different investments. The theory is that if some of the investments in your portfolio decline in value, others may rise or hold steady, helping to offset the losses.

### Diversifying within asset classes

For example, say you wanted to invest in stocks. Rather than investing in just domestic stocks, you could diversify your portfolio by investing in foreign stocks as well. Or you could choose to include the stocks of different size companies (small-cap, mid-cap, and/or large-cap stocks).

If your primary objective is to invest in bonds for income, you could choose both government and corporate bonds to potentially take advantage of their different risk/return profiles. You might also choose bonds of different maturities, because long-term bonds tend to react more dramatically to changes in interest rates than short-term bonds. As interest rates rise, bond prices typically fall.

### Investing in mutual funds

Because mutual funds invest in a mix of securities chosen by a fund manager to pursue the fund's stated objective, they can offer a certain level of "built-in" diversification. For this reason, mutual funds may be an appropriate choice for novice investors or those wishing to take more of a hands-off approach to their portfolios. Including a variety of mutual funds with different objectives and securities in your portfolio will help diversify your holdings that much more.

*Mutual funds are sold by prospectus. Please consider the investment objectives, risks, charges, and expenses carefully before investing. The prospectus, which contains this and other information about the investment company, can be obtained from your financial professional. Be sure to read the prospectus carefully before deciding whether to invest.*

### Diversifying among asset classes

You might also consider including a mix of different types of asset classes — stocks, bonds, and cash — in your portfolio. Asset allocation is a strategic approach to diversifying your portfolio. After carefully considering your investment goals, time horizon, and risk tolerance, you would then invest different percentages of your portfolio in targeted asset classes to pursue your goal.

### Winning asset classes over time

The following table, which shows how many times during the past 30 years each asset class has come out on top in terms of performance, helps illustrate why diversifying among asset classes can be important.

	Number of winning years, 1987-2016
Cash	3
Bonds	5
Stocks	10
Foreign stocks	12

Performance is from December 31, 1986, to December 31, 2016. Cash is represented by Citigroup 3-month Treasury Bill Index. Bonds are represented by the Citigroup Corporate Bond Index, an unmanaged index. Stocks are represented by the S&P 500 Composite Price Index, an unmanaged index. Foreign stocks are represented by the MSCI EAFE Price Index, an unmanaged index. Investors cannot invest directly in any index. However, these indexes are accurate reflections of the performance of the individual asset classes shown. Returns reflect past performance and should not be considered indicative of future results. The returns do not reflect taxes, fees, brokerage commissions, or other expenses typically associated with investing.

The principal value of cash alternatives may fluctuate with market conditions. Cash alternatives are subject to liquidity and credit risks. It is possible to lose money with this type of investment.

The return and principal value of stocks may fluctuate with market conditions. Shares, when sold, may be worth more or less than their original cost.

U.S. Treasury securities are guaranteed by the federal government as to the timely payment of principal and interest, whereas corporate bonds are not. The principal value of bonds may fluctuate with market conditions. Bonds are subject to inflation, interest rate, and credit risks. Bonds redeemed prior to maturity may be worth more or less than their original cost.

The risks associated with investing on a worldwide basis include differences in financial reporting, currency exchange risk, as well as economic and political risk unique to the specific country.

Investments offering the potential for higher rates of return also involve higher risk.

## Key Retirement and Tax Numbers for 2017

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans, thresholds for deductions and credits, and standard deduction and personal exemption amounts. Here are a few of the key adjustments for 2017.

### Retirement plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$18,000 in compensation in 2017 (the same as in 2016); employees age 50 and older can defer up to an additional \$6,000 in 2017 (the same as in 2016).
- Employees participating in a SIMPLE retirement plan can defer up to \$12,500 in 2017 (the same as in 2016), and employees age 50 and older will be able to defer up to an additional \$3,000 in 2017 (the same as in 2016).

### IRAs

The limit on annual contributions to an IRA remains unchanged at \$5,500 in 2017, with individuals age 50 and older able to contribute an additional \$1,000. For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA is phased out for the following modified adjusted gross income (AGI) ranges:

	2016	2017
<b>Single/head of household (HOH)</b>	\$61,000 - \$71,000	\$62,000 - \$72,000
<b>Married filing jointly (MFJ)</b>	\$98,000 - \$118,000	\$99,000 - \$119,000
<b>Married filing separately (MFS)</b>	\$0 - \$10,000	\$0 - \$10,000

**Note:** The 2017 phaseout range is \$186,000 - \$196,000 (up from \$184,000 - \$194,000 in 2016) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered.

The modified AGI phaseout ranges for individuals making contributions to a Roth IRA are:

	2016	2017
<b>Single/HOH</b>	\$117,000 - \$132,000	\$118,000 - \$133,000
<b>MFJ</b>	\$184,000 - \$194,000	\$186,000 - \$196,000
<b>MFS</b>	\$0 - \$10,000	\$0 - \$10,000

### Estate and gift tax

- The annual gift tax exclusion remains at \$14,000.
- The gift and estate tax basic exclusion amount for 2017 is \$5,490,000, up from \$5,450,000 in 2016.

### Personal exemption

The personal exemption amount remains at \$4,050. For 2017, personal exemptions begin to phase out once AGI exceeds \$261,500 (single), \$287,650 (HOH), \$313,800 (MFJ), or \$156,900 (MFS).

**Note:** These same AGI thresholds apply in determining if itemized deductions may be limited. The corresponding 2016 threshold amounts were \$259,400 (single), \$285,350 (HOH), \$311,300 (MFJ), and \$155,650 (MFS).

### Standard deduction

These amounts have been adjusted as follows:

	2016	2017
<b>Single</b>	\$6,300	\$6,350
<b>HOH</b>	\$9,300	\$9,350
<b>MFJ</b>	\$12,600	\$12,700
<b>MFS</b>	\$6,300	\$6,350

**Note:** The 2016 and 2017 additional standard deduction amount (age 65 or older, or blind) is \$1,550 for single/HOH or \$1,250 for all other filing statuses. Special rules apply if you can be claimed as a dependent by another taxpayer.

### Alternative minimum tax (AMT)

AMT amounts have been adjusted as follows:

	2016	2017
<b>Maximum AMT exemption amount</b>		
<b>Single/HOH</b>	\$53,900	\$54,300
<b>MFJ</b>	\$83,800	\$84,500
<b>MFS</b>	\$41,900	\$42,250
<b>Exemption phaseout threshold</b>		
<b>Single/HOH</b>	\$119,700	\$120,700
<b>MFJ</b>	\$159,700	\$160,900
<b>MFS</b>	\$79,850	\$80,450
<b>26% on AMTI* up to this amount, 28% on AMTI above this amount</b>		
<b>MFS</b>	\$93,150	\$93,900
<b>All others</b>	\$186,300	\$187,800

\*Alternative minimum taxable income

## What's the difference between a direct and indirect rollover?

If you're eligible to receive a taxable distribution from an employer-sponsored retirement plan [like a 401(k)],

you can avoid current taxation by instructing your employer to roll the distribution directly over to another employer plan or IRA. With a direct rollover, you never actually receive the funds.

You can also avoid current taxation by actually receiving the distribution from the plan and then rolling it over to another employer plan or IRA within 60 days following receipt. This is called a "60-day" or "indirect" rollover.

But if you choose to receive the funds rather than making a direct rollover, your plan is required to withhold 20% of the taxable portion of your distribution (you'll get credit for the amount withheld when you file your federal tax return). This is true even if you intend to make a 60-day rollover. You can still roll over the entire amount of your distribution, but you'll need to make up the 20% that was withheld using other assets.

For example, if your taxable distribution from the plan is \$10,000, the plan will withhold

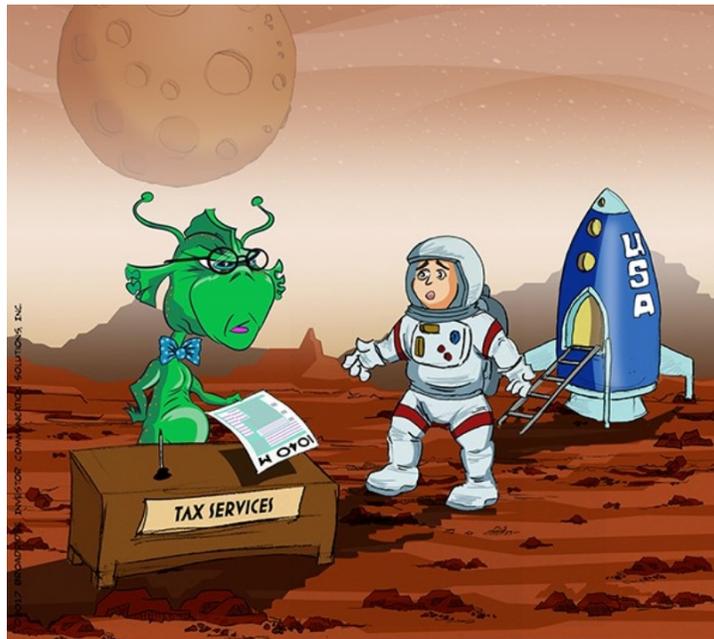

\$2,000 and you'll receive a check for \$8,000. You can still roll \$10,000 over to an IRA or another employer plan, but you'll need to come up with that \$2,000 from your other funds.

Similarly, if you're eligible to receive a taxable distribution from an IRA, you can avoid current taxation by either transferring the funds directly to another IRA or to an employer plan that accepts rollovers (sometimes called a "trustee-to-trustee transfer"), or by taking the distribution and making a 60-day indirect rollover (20% withholding doesn't apply to IRA distributions).

Under recently revised IRS rules, you can make only one tax-free, 60-day, rollover from any IRA you own (traditional or Roth) to any other IRA you own in any 12-month period. However, this limit does not apply to direct rollovers or trustee-to-trustee transfers.

Because of the 20% withholding rule, the one-rollover-per-year rule, and the possibility of missing the 60-day deadline, in almost all cases you're better off making a direct rollover to move your retirement plan funds from one account to another.

## Cartoon: Taxes Are Universal

THE GOOD NEWS IS THAT YOUR MILEAGE DEDUCTION IS \$17 MILLION.  
THE BAD NEWS IS THAT OUR TAX RATES ARE OUT OF THIS WORLD
